JTL SHOP SUPPORTER.

Shop system at the highest level

Before you can sell goods online, the question arises about the right shop system. As a JTL Enterprise service partner, there is of course only one answer for us: Use the complete solution of JTL software JTL Shop! The special thing about the JTL shop? Regardless of whether you are a beginner, a transitioner or a newcomer, you will also receive free and cross-platform merchandise management JTL-Wawi.

- Advice, installation & setup
- Design, implementation and adaptation of templates
- Plugin Development
- Performance optimization
- Updates Service
- Distance training and on-site service

JTL-WAWI EXPERTS.

Free all-rounder

Are you looking for a merchandise management company to help you with your offline and online trading? Then you are well served with the free JTL-Wawi! It supports you – thanks to automated workflows – in everyday work. As JTL-Wawi experts, we help you set up workflows and print templates, connect them to sales channels and expand them to warehouse management. We offer:

- Advice, installation & setup
- Data transfer
- Remote maintenance/training and on-site service
- Print template customization
- Additional programming

JTL SHOP PLUGINS.

Better, faster, more comfortable

Even the best shop system is not a „jack of all trades“ and requires a plugin for certain functions. As a JTL Enterprise service partner, we develop high-quality extensions for the JTL shop, so-called plugins. Whether it's a solution tailored to your needs or one that could be useful to the general public, we ensure reliable quality.

- Individual plugins for your needs
- Your shop remains 100% updateable
- No programming knowledge necessary
- We help with installation and setup
- Reliable quality from certified JTL Enterprise service partner

E-COMMERCE STRATEGISTS.

We would be happy to advise you

Not every online shop has them and yet they can help you stand out from the competition: The right marketing strategy in e-commerce. There are many measures that prove to be extremely effective and useful, so they should be an important part of online shop marketing.

Are you looking for a partner to whom you want to leave the optimization of your strategy entirely to? Then we are the right contact! We analyze your JTL shop (of course also other shop systems) and work with you to develop the right approach for you in order to achieve your goal. We have summarized the most important steps for a successful e-commerce strategy below to give you a brief insight into our work.

ONLINE MARKETING CONSULTANT.

Notice on the web

There are different forms of online marketing. In e-commerce, search engine marketing is still one of the most profitable channels for acquiring new customers. In particular, the implementation of so-called „search engine marketing“ measures (e.g. Google Ads) initially helps in order to be able to compete with already established companies. We offer you the following advantages:

- Many years of experience in the SEA area
- Free initial consultation
- Free analysis of existing Google Ads accounts
- Full service in the creation and support of campaigns
- Ongoing optimization measures

SOCIAL MEDIA PIONEER.

Facebook, Pinterest and co.

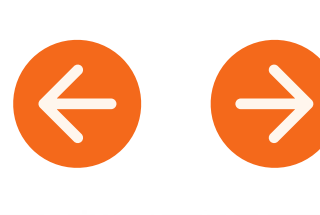

Social media marketing, SMM for short, is becoming increasingly important in the e-commerce sector and should also be considered after the SEM measures. The younger generations among us in particular are better reached through Facebook, Instagram and Pinterest, especially when the content appeals to them. An overview of our social media consulting services:

- Free analysis of existing presences
- Advice on channel selection
- Development of a content strategy
- Advice on creating content
- Creation and optimization of advertisements

Benefits of ris.dev as Your Software Development partner.
